

Senior Software Engineer

📍 Noosa, QLD

Senior software engineer with 10+ years of experience, including seven years in startup and scale-up environments. I specialise in Go, TypeScript, API development and event-driven systems, and have led products and platform capabilities from early discovery through to production. I enjoy working closely with product, design and engineering teams to solve real customer problems with scalable, secure and maintainable software.

EXPERIENCE

Senior Software Engineer - UPowr

Feb 2024 - Present

- Lead the design and delivery of capabilities across Go services, TypeScript APIs and a Flutter application.
- Designed an external SDK and plugin architecture supporting platform integrations and extensibility.
- Translate ambiguous product requirements into maintainable technical designs alongside product, design and engineering.
- Build business-critical Camunda workflows and Playwright tests, while supporting on-call incidents, secure authentication and webhook validation.

Senior Software Engineer - Descartes

Sep 2019 - Feb 2024

- Built multi-tenant Go and TypeScript microservices using Kafka and AWS within an event-driven architecture.
- Led delivery of a large customer-facing Next.js, GraphQL and TypeScript application.
- Re-platformed a Kafka-to-S3 analytics pipeline from Athena to Snowflake and dbt.
- Led the design and delivery of a high-volume survey platform.

Senior Full Stack Developer - Procurement Leaders

Feb 2016 - Jun 2019

- *Led solution design, implementation decisions, code reviews and developer coaching.*
- *Built React applications and GraphQL and REST APIs, delivered a Salesforce-integrated event platform and established CircleCI-based CI/CD.*

E-Commerce Manager - HoundHouse

May 2015 - Nov 2015

Web Developer - AD Marketing

Apr 2015 - Nov 2015

Web Developer - M&D Employment

Jun 2013 - Nov 2015
