

Senior Software Engineer

📍 Sunshine Coast, QLD

Senior software engineer with a passion for building products that delight users. I enjoy getting into the technical details and working with product teams to solve real customer problems. Over seven years at startups, I've led the design and development of several products, working across the whole stack.

EXPERIENCE

Senior Software Engineer at UPowr

Feb 2024 - Present

- Led the technical design and development of major features across the Node.js/TypeScript backend, Go services and a Flutter app
- Led the design of an external SDK, plugin system and key platform integrations
- Led technical discussions and architectural designs
- Designed, implemented and maintained complex workflows in Camunda
- Develop and maintain E2E tests with Playwright

Senior Software Engineer at Descartes

Sep 2019 - Feb 2024

- Designed and built multi-tenant microservices in Go and Node.js/TypeScript on an event-driven architecture
- Led a large customer-facing app in Next.js, GraphQL, and TypeScript
- Re-platformed the Kafka-to-S3 analytics pipeline from Athena onto Snowflake and dbt
- Led the design and implementation of a high-volume survey platform

Senior Full Stack Developer at Procurement Leaders

Feb 2016 - Jun 2019

- *Led and coached developers, owning technical solution design and code reviews*
- *Built an interactive event hub (Next.js, GraphQL, MongoDB) for Europe's largest procurement events, with live session feedback, networking and content synced from Salesforce*
- *Developed GraphQL and REST APIs with Node.js, TypeScript, Apollo, Express and MongoDB; built React apps with Next.js, Redux and Apollo*
- *Established CircleCI for CI/CD and configured Ubuntu/Nginx web server*
